Instructions

Using the cards provided, index and code each card for a geographic classification system. Arrange them in correct order by organizing first by province, then by city, then by company or person's name. If the company name is the same, refer to the street. Please reference your Student Guide (page 8) and PowerPoint (slide 26) for several examples on geographical filing. You'll find the cards below the chart (scroll down).

On the chart below, record the number found in the top right corner of each card as they appear on your cards in the correct order.
